Reasons for Allowance

Claims 1-19 are allowed. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest, **"controlling the voltage distribution of the two serially-coupled batteries by controlling the potential at an intermediate connection point between the two serially-coupled batteries to purposefully create an applied voltage imbalance between the two serially-coupled batteries of the battery system; and utilizing the applied voltage imbalance between different serially-coupled batteries of the system during operation of the battery system"** as recited in independent claim 1. Claims 2-7 and 12 depend from 1 and are allowable for the same reasons.

The prior art does not teach or suggest, **"DC-to-DC-converting means connected to said battery system; and a controller connected to said voltage sensing means and to said DC-to-DC-converting means and being arranged to control the voltage distribution over the serially-coupled batteries of the battery system via said DC-to-DC-converting means by controlling the potential at an intermediate connection point between the two serially coupled batteries to purposefully create an applied voltage imbalance between different serially-coupled batteries of the battery system"** as recited in independent claim 8. Claims 9-11 and 13 depend from 8 and are allowable for the same reasons.

The prior art does not teach or suggest, **"a controller connected to the voltage detector and to the battery charger and being arranged to receive from the**

voltage detector a first detected voltage for the first battery and a second detected voltage for the second battery that is different than the first detected voltage, the controller being further arranged to control the battery charger to charge the first battery at a first charging voltage based on the first detected battery voltage and to charge the second battery at a second different charging voltage based on the detected second battery voltage by controlling the potential at an intermediate connection point between the two serially coupled batteries" as recited in independent claim 14. Claims 15-19 depend from 14 and are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
